Company Introduction

About Chuanheng

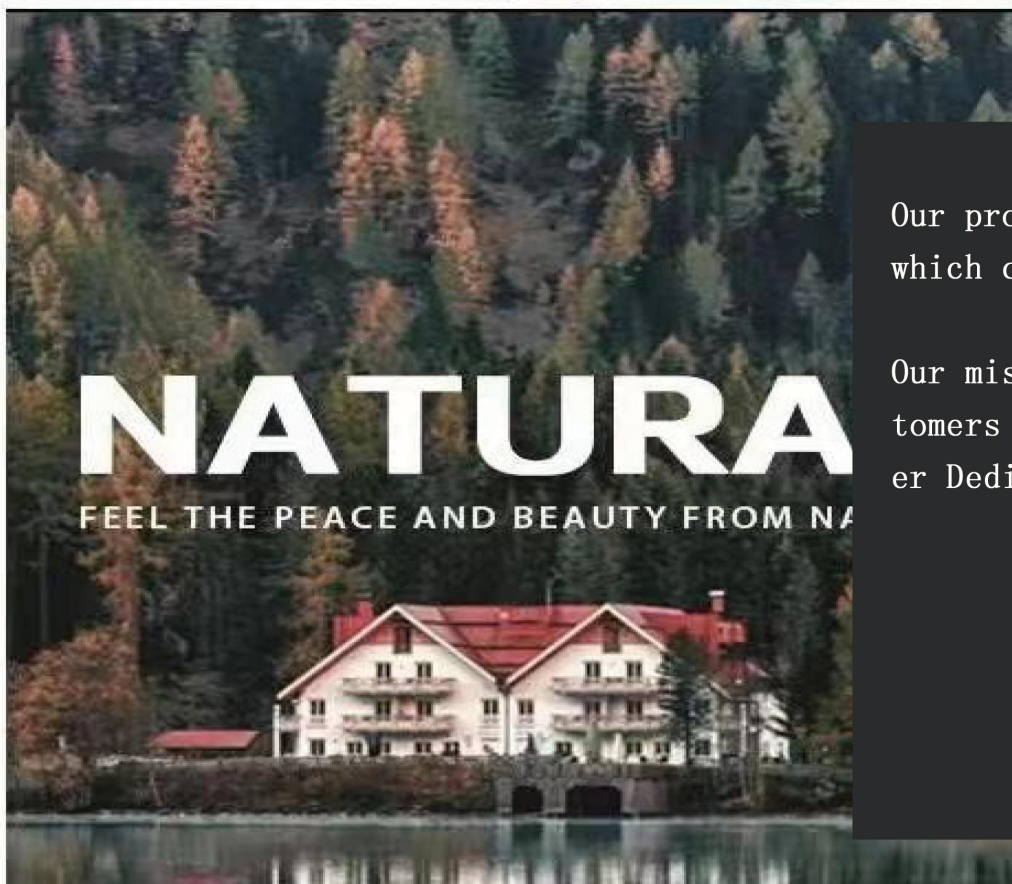

Shandong Chuanheng Decoration Materials Co.,Ltd is one of the fastest-growing laminate flooring and SPC flooring manufacturers in China. We are a company dealing specially with the export of laminate flooring and SPC flooring.

We have a good variety of colors and sizes to meet different needs. These products are of good quality, competitive price, and sell well. Our total production is 3million square meters per year, 80% for export and 20% for the domestic market. In the 10 years that we have been selling our products, we have made a good name for ourselves in countries around the world and are ISO 9001, ISO 14001 certified.

About Chuanheng

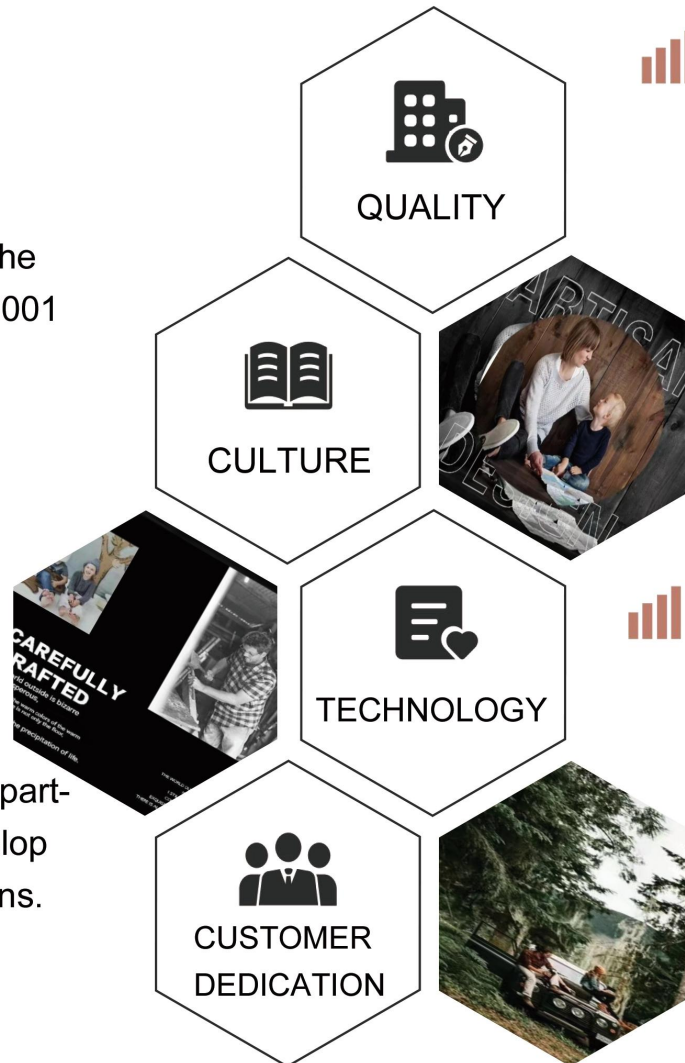

Our products, various surfaces, and various sizes which can meet lots of buyers' targets!

Our mission of providing Quality Flooring to our Customers is based on four cornerstones: Quality, Customer Dedication, Culture and Technology

Company Mission

 **QUALITY**- Our pledge is to provide the Highest Quality Flooring using ISO 9001 and ISO 14001 standards.

 **CUSTOMER DEDICATION** - To form partnerships with our customers that develop true understanding and communications.

 **CULTURE** - Our commitment to our employees is to create an environment that encourages training, safe workplace, dignity, and respect.

 **TECHNOLOGY** - To provide modern technology to the marketplace producing the Highest Quality Products at Competitive Pricing.

Six core technologies

Six core technologies

National Environmental Protection Standard

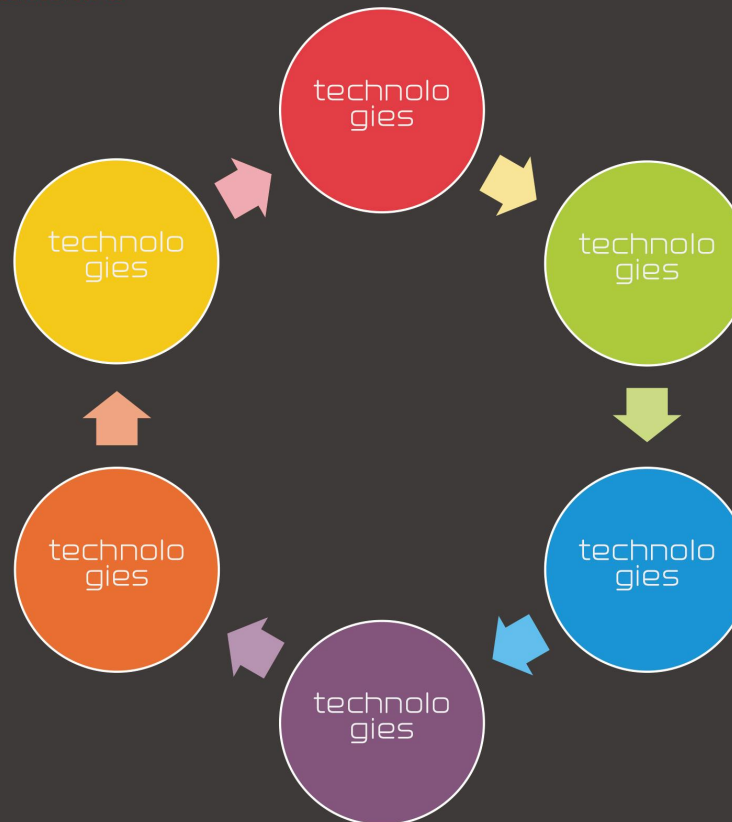

Selection of high-quality wood, the highest health and environmental protection standards, ready-to-use, formaldehyde added throughout the process. environmental protection and health, and home space is more assured.

Multiple processes, just for a good floor

It seems like a series of simple and repetitive boring data, but it is as meticulously crafted and tireless as the artists creation .

High Density Substrate

It seems like a series of simple and repetitive boring data, but it is as meticulously crafted and tireless as the artist's creation

Unique moisture-proof technology

Effectively control the floor's "water-absorbing expansion and drying shrinkage when heated. At the same time the moisture-- proof performance is greatly improved making a beautiful life full of leisure.

Suitable for geothermal

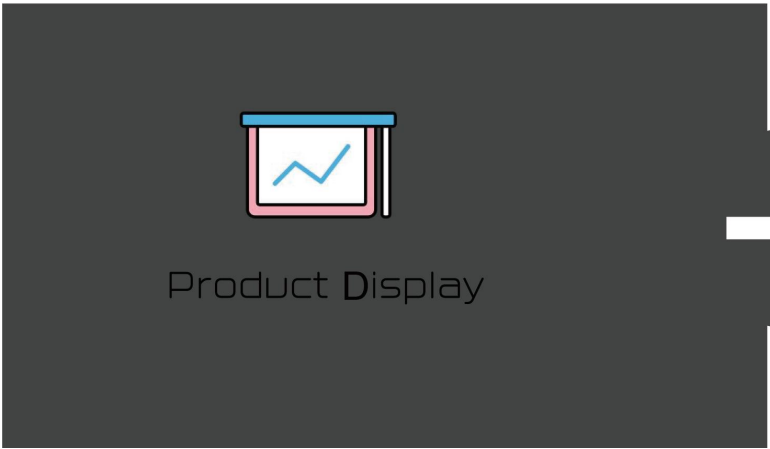

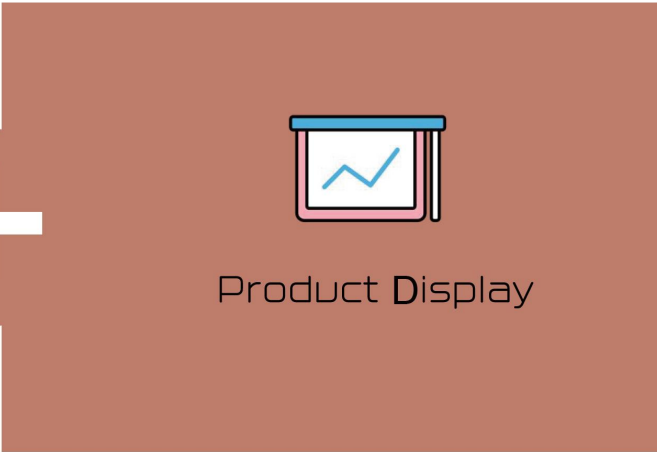

Using high-density fiber base material. High temperature thermoforming the crisscross fiber formaldehyde added throughout the process. structure creates balanced and stable characteristics .

Smart lock

Using intelligent locking technology, glue-free installation. it can withstand huge pulling force without opening the glue or loosening .
